Cláudio Gomes
Peter Gorm Larsen *Editors*

The Engineering of Digital Twins

 Springer

Contents

Preface	v
Using the Book	vii
Accompanying Web Site	viii
Acknowledgments	ix
References	ix
List of Contributing Authors	xvii
Acronyms	xxi
Part I Foundations	
1 Engineering Digital Twins for Cyber-Physical Systems	3
Peter Gorm Larsen, John Fitzgerald and Cláudio Gomes	
1.1 Introduction	3
1.2 Cyber-Physical Systems and Digital Twins	5
1.3 Aspects of DT Engineering	7
1.4 The Transition to Digital Twins	13
References	15
2 The Potential of Digital Twins: Four Industry Perspectives	19
John Fitzgerald, Peter Gorm Larsen, Cláudio Gomes, Rob Charlton, Klaus Kristensen, Stylianos Basagiannis and Jonas Åkeson	
2.1 Round Table Discussion Structure	19
2.2 Introductions	20
2.3 Businesses	20
2.4 Where are you thinking of targeting DT technology?	22
2.5 What does success look like?	26
2.6 Why Digital Twins?	29
2.7 Stakeholders, Developers and Users	30

2.8 How would you expect to develop DTs?..... 32

2.9 Do DTs help Dependability? 38

2.10 Themes..... 41

References 43

3 Foundational Concepts for Digital Twins of Cyber-Physical Systems . 45
 Cláudio Gomes, Bentley James Oakes, John Fitzgerald, Peter Gorm Larsen

3.1 Introduction 45

3.2 Running Example: the Tempeh Incubator System..... 46

3.3 Basic System Concepts 50

3.4 Models & Data 52

3.5 Digital Twin Services 55

3.6 Digital Twin Assets and Management 58

References 62

4 Digital Twin Engineering Processes 65
 John Fitzgerald, Ken Pierce and Klaus Kristensen

4.1 Introduction 65

4.2 DT Engineering as Systems Engineering 66

4.3 Stakeholders’ Expectations, Needs and Requirements Processes .. 68

4.4 System Requirements and Architecture Processes 70

4.5 Realisation Processes 73

4.6 The DT-Enabled System in Operation 77

4.7 Tailoring Processes and Teams 80

4.8 Processes and Competencies 82

References 86

Part II Models and Data

5 Modelling for Digital Twins 89
 Giuseppe Abbiati, Cláudio Gomes, Michael Sandberg, Zahra Kazemi, Simon Thrane Hansen and Peter Gorm Larsen

5.1 Introduction 89

5.2 Overview of Modelling Formalisms 90

5.3 Models for the Incubator Example 92

5.4 Physics-based Models 94

5.5 Data-driven Models 104

5.6 Models for Computer-Based Systems..... 115

5.7 Coupling of Heterogeneous Models 119

References 124

- 6 Calibration of Models for Digital Twins** 129
 Cláudio Gomes, Hao Feng, Zahra Kazemi and Ken Pierce
 - 6.1 Introduction 129
 - 6.2 What is Calibration? 130
 - 6.3 Calibration of Linear Algebraic Models 131
 - 6.4 Calibration of Non-Linear Algebraic Models 135
 - 6.5 Practical Considerations 144
 - References 146

- 7 Sensing and Communication of Data from the Physical Twin** 147
 Cláudio Gomes, Daniel Enrique Lucani Rötter, Alexandros Iosifidis,
 Hao Feng, Henrik Ejersbo and Mirgita Frasheri
 - 7.1 Introduction 147
 - 7.2 Sensors and Their Limits 148
 - 7.3 Network Communication 155
 - 7.4 Message-Based Communication 163
 - 7.5 Storing Data in Time-Series Databases 164
 - 7.6 Software Sensing 166
 - References 168

Part III Services for Digital Twins

- 8 Visualisation in a Digital Twin Context** 175
 Christian H. Bohlbro, Hugo Daniel Macedo, Daniella Tola, Lukas
 Esterle, and Peter Gorm Larsen
 - 8.1 Introduction 175
 - 8.2 Visualisation 176
 - 8.3 Visualisation Services in a Digital Twin 177
 - 8.4 Frameworks used for DT Visualisation 182
 - 8.5 Visualisation Examples 185
 - References 188

- 9 System Monitoring through a Digital Twin** 189
 Mirgita Frasheri, Panagiotis Katsaros, Alexandros Iosifidis, Simon
 Thrane Hansen, Cláudio Gomes, Valdemar Tang, and Peter Gorm
 Larsen
 - 9.1 Introduction 189
 - 9.2 Describing Desirable Properties 191
 - 9.3 Monitoring using Runtime Verification 200
 - 9.4 Data-driven Anomaly Detection 201
 - References 204

10	Advanced Digital Twin Services	209
	Mirgita Frasheri, Till Böttjer, Peter Gorm Larsen, Lukas Esterle and Cláudio Gomes	
10.1	Introduction	209
10.2	What-if Simulations	210
10.3	Fault Diagnosis and Resilience	217
10.4	Predictive Maintenance	218
10.5	Re-configuration, Robustness and Optimisation	219
	References	221
	Part IV Realising Digital Twins	
11	Realising Digital Twins	225
	Prasad Talasila, Peter Høgh Mikkelsen, Santiago Gil and Peter Gorm Larsen	
11.1	Introduction	225
11.2	Digital Twin Frameworks	226
11.3	Cloud and Virtualisation Technologies	229
11.4	Digital Twin Composition	230
11.5	Digital Twin and Physical Twin Configuration	232
11.6	Digital Twin Class and Instances	239
11.7	DTaaS: Reference Architecture for Digital Twin Platforms	240
11.8	DTaaS: the DT Execution Manager	244
11.9	Prototype Implementation	249
11.10	Support for DT Services	251
11.11	Fleet Analysis	252
	References	254
12	Case Studies in Digital Twins	257
	Bentley James Oakes, Houxiang Zhang, Lars Ivar Hatledal, Hao Feng, Mirgita Frasheri, Michael Sandberg, Santiago Gil and Cláudio Gomes	
12.1	Introduction	257
12.2	Summary of Characteristics	258
12.3	The Tempeh Incubator	259
12.4	The (Desktop) Robotti	273
12.5	The Flex-cell	287
12.6	The Research Vessel Gunnerus	297
	References	308

Part V Advanced Topics

13 Security and Privacy-related Issues in a Digital Twin Context 313
 Tomas Kulik, Zahra Kazemi and Peter Gorm Larsen

13.1 Introduction 313

13.2 DT Security Architecture 314

13.3 Approaches to a DT Security and Privacy 319

13.4 Intellectual Property Protection 339

13.5 Security in the Real World 340

References 341

14 Autonomous Reconfiguration Enabled by Digital Twins 345
 Lukas Esterle, Mirgita Frasheri and Peter Gorm Larsen

14.1 Introduction 345

14.2 Autonomous Systems and DTs 346

14.3 Self-* properties 352

14.4 Goals 356

14.5 Collaboration between Systems 357

14.6 Safety and uncertainty in reconfiguration 359

14.7 Roadmap 360

References 360

15 Future Directions and Challenges 363
 Peter Gorm Larsen, John Fitzgerald, Cláudio Gomes, Jim Woodcock,
 Stylianos Basagiannis, Alessandro Ulisse, Lukas Esterle, Daniel Enrique
 Lucani Rötter, Simon Thrane Hansen and Bentley James Oakes

15.1 Introduction 363

15.2 Firm Foundations for Digital Twin Engineering 364

15.3 Digital Twin Platforms 370

15.4 Increasing the Level of Autonomy for Digital Twins 375

15.5 Supporting Composition of Digital Twins 378

15.6 Novel Applications of Digital Twins 381

15.7 Concluding Remarks 381

References 382

List of Contributing Authors

Giuseppe Abbiati

Aarhus University, Aarhus, Denmark

e-mail: abbiati@cae.au.dk

Santiago Gil Arboleda

Aarhus University, Aarhus, Denmark

e-mail: sgil@ece.au.dk

Stylianos Basagiannis

Int. Hellenic Univ./ Collins Aerospace, Greece/Ireland

e-mail: stylianos.basagiannis@collins.com

Christian H. Bohlbro

Bohlbro.dk, Denmark

e-mail: hello@bohlbro.dk

Till Böttjer

Aarhus University, Aarhus, Denmark

e-mail: till.boettjer@ece.au.dk

Rob Charlton

Space Group, Newcastle upon Tyne, United Kingdom

e-mail: Rob.Charlton@spacegroup.co.uk

Henrik Ejersbo

Grundfos, Bjerringbro, Denmark

e-mail: hejersbo@grundfos.com

Lukas Esterle

Aarhus University, Aarhus, Denmark

e-mail: lukas.esterle@ece.au.dk

Hao Feng

Huawei, Shenzhen, People's Republic of China

e-mail: haof.au@outlook.com

John S Fitzgerald (*editor*)

Newcastle University, Newcastle upon Tyne, United Kingdom

e-mail: john.fitzgerald@newcastle.ac.uk

Mirgita Frasheri

Aarhus University, Aarhus, Denmark

e-mail: mirgita.frasheri@ece.au.dk

Cláudio Gomes (*editor*)

Aarhus University, Aarhus, Denmark

e-mail: claudio.gomes@ece.au.dk

Simon Thrane Hansen

Aarhus University, Aarhus, Denmark / University of Luxembourg, Luxembourg City, Luxembourg

e-mail: simon.hansen@uni.lu

Lars Ivar Hatledal

Norwegian University of Science and Technology, Ålesund, Norway

e-mail: laht@ntnu.no

Alexandros Iosifidis

Aarhus University, Aarhus, Denmark

e-mail: ai@ece.au.dk

Panagiotis Katsaros

Aristotle University of Thessaloniki, Thessaloniki, Greece

e-mail: katsaros@csd.auth.gr

Zahra Kazemi

Aarhus University, Aarhus, Denmark (now working at Vestas, Denmark)

e-mail: zahrakazemi1991@gmail.com

Klaus Kristensen

Bang & Olufsen, Struer, Denmark

e-mail: KRT@Bang-Olufsen.dk

Tomas Kulik

Sweet Geeks, Vejle, Denmark

e-mail: tku@sweetgeeks.dk

Peter Gorm Larsen (*editor*)

Aarhus University, Aarhus, Denmark

e-mail: pgl@ece.au.dk

Hugo Daniel Macedo
Aarhus University, Aarhus, Denmark
e-mail: hdm@ece.au.dk

Peter Høgh Mikkelsen
Aarhus University, Aarhus, Denmark
e-mail: phm@ece.au.dk

Bentley James Oakes
Polytechnique Montréal, Montréal, Canada
e-mail: bentley.oakes@polymtl.ca

Ken Pierce
Newcastle University, Newcastle upon Tyne, United Kingdom
e-mail: kenneth.pierce@newcastle.ac.uk

Daniel Enrique Lucani Rötter
Aarhus University, Aarhus, Denmark
e-mail: daniel.lucani@ece.au.dk

Michael Sandberg
Aarhus University, Aarhus, Denmark
e-mail: ms@mpe.au.dk

Prasad Talasila
Aarhus University, Aarhus, Denmark
e-mail: prasad.talasila@ece.au.dk

Valdemar Tang
Aarhus University, Aarhus, Denmark
e-mail: valdemar.tang@ece.au.dk

Daniella Tola
Aalborg University, Denmark
e-mail: dato@mp.aau.dk

Alessandro Ulisse
Collins Aerospace, Rome, Italy
e-mail: alessandro.ulisse@collins.com

Jim Woodcock
Aarhus University, Aarhus, Denmark / York University, York, United Kingdom
e-mail: jim.woodcock@york.ac.uk

Houxiang Zhang
Norwegian University of Science and Technology, Ålesund, Norway
e-mail: hozh@ntnu.no

Jonas Åkeson
Grundfos, Bjerringbro, Denmark
e-mail: jakeson@grundfos.com
